Video Edit Brief: Juliet Funnels Portfolio Introduction

Your role
Edit my portfolio introduction video into a polished, premium 16:9 video.
Work in stages and show me a preview or summary after each stage before moving on.

Files I'm providing
- talking_head.mp4: my face-to-camera recording (hook, intro, closing)
- demo_screen.mp4: screen recording of my n8n creator screening demo
- portfolio_clips/: screen recordings of my project cards, funnels and websites
- logos/: Juliet Funnels logo + tool logos (GoHighLevel, Systeme.io, Make.com, n8n, Zapier)
- music.mp3 and sfx/: licensed background music and sound effects
- fonts/: my brand fonts
Use only these files. If you need something I haven't provided, ask me. Do not substitute.

Goal and audience
Viewers are recruiters and potential clients. After watching, they should know:
1. Who I am and my background
2. What I build
3. That my n8n demo genuinely works
4. How to contact me
Target length: 1:45–2:00. Follow my recorded audio, not the script timestamps.

Stage 1: Clean-up
- Transcribe the recording and send me the transcript with timecodes.
- Remove filler words, false starts and silences longer than 0.5 seconds.
 Keep my natural voice and pacing.
- Hide cuts inside a sentence with a subtle punch-in (105–110%) or a B-roll overlay.
- Never change the meaning of anything I say.

Stage 2: Brand graphics
Brand: Juliet Funnels. Premium, minimal, Apple-inspired.
Colors:
- Deep Forest Green #17352B: backgrounds, title cards, transitions (dominant color)
- Dark Emerald Green #21483A: diagrams, panels, depth
- Soft Muted Gold #C6A15B: emphasis only (keywords, orbit, outlines, progress)
- Warm Ivory #F2F0E6: all text and captions
Fonts: Playfair Display for titles (gold italic for emphasis words), Poppins for labels and captions.
Motion: one consistent style, smooth ease-in-out, 300–500 ms per animation.

Graphics, tied to what I say:
When I say	Show

"manual follow-up and screening"	Gold text emphasis
"the systems that fix that"	Zoom-through transition to forest green
"Hi, I'm Juliet"	Lower third: Juliet Tecson / GoHighLevel & Marketing Automation Specialist
Each tool name	Orbit animation: each logo joins a gold orbit as I name it
"I built this in n8n as a portfolio project"	Small label: "Portfolio Build"
Demo steps	Step bar: Apply → Clean & Check → Match → AI Score → Shortlist; current step in gold
"campaign requirements"	Checklist ticks: Level, Niche, Avg Views, Rate
"0 to 100"	Gold ring callout around the real score in the sheet
"shortlist arriving"	Highlight the real email notification
"Why it's effective" section	Four labels: Consistent Screening, Duplicate Detection, AI-Assisted Scoring, Human Final Approval
Portfolio section	2–3 s clips of my project cards with title labels, zoom-through between them
Closing	End card: logo, name, title, julietfunnel.kimi.page, email, "Book a Call". Hold for 4 seconds.

Stage 3: Demo authenticity rules
- Use only my real screen recordings. You may trim waiting time, but never insert, alter or fake a result.
- Zoom in so interface text is readable at 1080p.
- Do not recolor real software interfaces; use brand-colored borders, callouts and highlights.
- Blur any email addresses, phone numbers, API keys or credentials.
- Phone mockups only for footage I actually recorded on a phone.

Stage 4: Captions
- Burned-in captions: Poppins, ivory text on a 70% forest green box, maximum 2 lines, inside the bottom safe area.
- Spell tools exactly: GoHighLevel, Systeme.io, Make.com, n8n, Zapier.
- Also export a separate .srt file.

Stage 5: Audio
- My voice is the priority; normalize to about -14 LUFS.
- Music low (about 20 dB below my voice), ducking further while I speak.
- Subtle sound effects only on: transitions, text reveals, checklist ticks, the orbit animation, and the notification arriving. No loud impacts, no stacked effects.

Style rules
- Every graphic must explain something I'm saying; no decoration for its own sake.
- No neon, heavy gradients, 3D effects or heavy shadows.
- Talking head is the focus in the hook, intro and closing; screen recordings lead in the demo.
- Keep all text and graphics inside safe margins.

Deliverables
1. Main video: 1920×1080, 30 fps, MP4 (H.264)

2. 30-second LinkedIn cut: hook + demo highlight + closing,
with the line "link in my profile" instead of "book a call below"
3. Captions file (.srt)
4. Thumbnail: 1280×720, my face + "I automate creator screening"

Final check before export
Watch the full video and list any mistimed animations, unreadable text,
audio jumps, awkward cuts or framing problems. Fix them, then export.

Script (as recorded)
Hook: "I started as a makeup artist, then ran TikTok creator campaigns for beauty brands. Both jobs had the same problem: hours of manual follow-up and screening. Now I build the systems that fix that."

Intro: "Hi, I'm Juliet, a GoHighLevel and marketing automation specialist. I build funnels and the automations behind them, using GoHighLevel, Systeme.io, Make.com, n8n and Zapier."

Demo, problem: "In a recent role, I screened TikTok creators for beauty campaigns: checking each application's level, views and rates one by one. It was slow, and it was hard to keep the screening consistent."

Demo, how it works: "So I built this in n8n as a portfolio project. A creator applies through this form… n8n cleans the data and checks whether the creator is already in the database. Then it checks the campaign requirements. Creators who qualify are scored by AI from 0 to 100, with strengths and concerns. And here's the shortlist arriving in the project manager's inbox."

Demo, why it's effective: "Every creator is screened against the same rules, duplicates are caught, and the project manager only reviews creators who already fit. AI recommends; the manager still makes the final call."

Portfolio: "My portfolio has more builds like this, from AI customer support in n8n to automated reports in Make.com, plus concept funnels and websites for clinics, coaches and real estate. You can see how each one works on my portfolio."

Closing: "If you need someone who can build the funnel and the automation behind it, I'd love to talk. Send me a message or book a call below. I'm Juliet. Thanks for watching, and I hope we talk soon."
